REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance. This office action is in response to communication filed on 09/22/2006. The prior art made of record in the attached form PTO-892 considered to be pertinent to the submitted application.

Schiess et al. disclose a drive for a yarn feeder for a textile machine. Wherein, Fig. 3 shows components including various subassemblies which make up the internal construction of the control circuit arrangement. The system is designed to observe the events occurring in the conversion under the control of the control voltage of DC supplied by a power pack 19 into a three-phase current having a variable frequency. The control voltage is supplied to a voltage controlled oscillator which produces a pulse series of a control frequency. A digital counting circuit is disposed after the oscillator and has three output terminals u, v, w corresponding to three phases of the required three-phase current. Each output terminal is adapted to emit a sequence of rectangular pulses of the variable pulse frequency proportional to the controlled voltage.

However, none of the prior art teaches or suggests claimed limitations in combination with:

- Power supply to the common bus of the set of yarn advancing elements is maintained by a flywheel so that the first and second systems are totally

electrically independent, only a value of ramp functions of both systems avoids any voltage fault.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rita Leykin whose telephone number is (571)272-2066. The examiner can normally be reached on Monday-Friday 8:00-4:30.
